**THURMAN SCALE ANNOUNCES PARTICIPATION IN  
2011 CON EXPO-CON/AGG SHOW IN LAS VEGAS, NEVADA**

Columbus, OH – January 25, 2011 – Thurman Scale, a leading supplier of scales for 90 years, specializing in off-road type and heavy capacity vehicle scales, today announces its participation in the 2011 Con Expo-Con/Agg Show in Las Vegas, March 22 - 26, 2011. This show is the largest International exposition in the Western Hemisphere for the aggregates, construction and ready mixed concrete industry, attracting top-level decision makers from around the world.

Located at booth # 886, Thurman Scale will be displaying the entire DiamondBack Truck Scale line of products including the 8560 Steel Deck Scale, the 8550 Field Pour Scale, the 8560XD Heavy Capacity Steel Deck Scale and the 8560PV Steel Deck Portable Vehicle Truck Scale. These scales represent the broadest line of truck scales products available to the construction, aggregate and concrete industry. Built to be rugged with massive steel components including a pair of dual main beams, the DiamondBack line outweighs the competition and has been designed to withstand the daily abuses of heavy loads driving across it. Thurman Scale will be displaying actual scale cut-away views for these products so that you can see the rugged design of these products.

Thurman will also be announcing a series of new instrumentation products to the industry at the 2011 Con/Agg Show. The IS-3200 is the latest fully featured Truck Scale indicator incorporating the Intalogix Technology. The IS-3200 is built on its successful predecessor the IS-3000, and provides a host of additional advanced features. Thurman Scale is also introducing the TS-4000 Programmable Indicator which comes in three models specifically designed to the Con/Agg industry, truck weighing, filling and batching.

Also on display at the Thurman Scale booth, are the new TS-500 General Indicator and the 218T Series Remote Display with Integrated Traffic Light. The 218T product can be used in applications where a weight display and traffic control capabilities are required. The integrated traffic light uses high-intensity LEDs to provide both green and red X indicators to help manage traffic flow across the scale.

Thurman Scales are built to the highest standards in the industry as a direct result of years of truck-weighing experience in demanding environments. To request more information or to obtain the name of the Thurman authorized distributor nearest you, please call (800) 688-9741, or visit *www.thurmanscale.com*.
